The Set-Back Information Provided on This Page Is For your Information

These references are to help you decide which firewall kit will best fit your particular application. There are many factors which will affect your choice of kits; engine set-back, radiator core thickness, air conditioning or super chargers. You need to determine the length of the engine package you intend to install and then figure out the distance you have from the back of the radiator core to the stock or existing firewall. To do this you will know how much extra room or set-back you will need. The firewall only fits in one place in the body, but your engine can be moved forward or backward as much as needed to obtain proper clearances. If you have any questions, please call our customer service dept. @ (928) 420-6346.

Measure the set-back from the face of the firewall back as illustrated.

NOTE: These firewalls are designed for the most popular engine-transmission conversion which is Chevy engine and GMC turbo transmission. Any other engine installation (Ford, Mopar, etc.) may require rework of the bell housing area of the firewall.

Tired of your original cowl vent leaking water or pulling dust, smoke, etc.? Do you just want to smooth up the cowl area? Bitchin Parts, makes a filler panel that might be just what you need. These 16 gauge steel filler panels come just a tick larger so they can be tuned for the perfect fit. The also have a beveled edge so the weld area is down, making it easier for a flush fit.

Typically if the floorboard goes, so do the rockers and if the floor goes, the body mounting brackets do too. Bitchin Parts, Inc.® makes Rocker Panel Kits that come with both the Inner and Outer rockers. Extensions can be added.

Any vehicle’s body is only as strong as its inner structure. It does not pay to take new sheet metal and put it over the top of an old rusted sub-structure. Before you put your new floorboards in, make sure your inner structure is solid. For the rusted out inner cowl areas, we make an inner cowl repair kit that is a must before you install a nice floor. RH or LH can be purchased separately.
The 1937-39 Chevy floorboards were designed & built in sections for the ease of installation and to allow the customer to purchase sections that you need. The illustration (below) shows the typical 37-39 floorboard kit breakdown. The Sedan floor comes in (4) basic kits. The coupe has (3) basic kits. The Bitchin Parts, Floorboard Kits are made of 16 gauge cold rolled steel and the formed parts are 18 gauge. Each kit comes complete with step-by-step instructions.

37-39 Chevy Car Front Floorboards available in 3 Kit Sizes and comes with a floorboard stiffener @ the rear of battery box opening forward to the firewall. Includes master cylinder access door kit, new body mounting brackets and complete instructions. These front floor kits will all clear automatic transmissions. For technical questions, please call (928) 420-6346.

We manufacture rear floorboard kits for Sedans and Coupes. Bitchin Parts kits have been designed to make your car more adaptable to the modern seats and drive trains. They will splice right into our front floorboard kits so you have a new floor from the firewall to the start of the trunk floorboard. All Kits complete new body mounting brackets & instructions. For technical questions, please call (928) 420-6346.

NOTE ON COUPE FLOORBOARD KIT - (1 kit) From the rear of the Bitchin Parts Front Floorboard Kit to the front of the trunk compartment. This kit has been redesigned to give you a nice flat floorboard from front to rear, making it easier to install the seats of your choice. Made of 16 & 18 gauge cold rolled steel.
Bitchin Parts makes (3) kits for the Sedans and (2) kits for the Coupes. The 1937 Sedan frame rail is shaped differently than the rail in the 1938-39 Sedans (making the floor where the gas filler neck is located unique in the 1937 models). After surveying several car builders throughout the country, we found that most people like to remove the gas tank from inside the car and use a Sedan type in the rear. Therefore, we designed our Coupe trunk floor higher like a Cabriolet so you can mount a tank under it like a Sedan. This removes a dangerous situation from inside your car and gives you extra room. Each kit is made of 16 gauge steel and comes complete with step-by-step instructions.

Mounting a battery in a street rod has always created problems, some major and some minor. Our battery box kits will solve most of the problems. The universal mounting brackets supplied with these kits allow you to choose the mounting method which best suits your application, including flush floor mounting, side mounting, or halfway through the floor for extra ground clearance. We offer three kits. The positive battery hold down, adequate ventilation and cable protection give added security to your battery installation.

- 31" APPROX.

- $330.00

**740106 40 FIREWALL KIT**
Big Block

- 27" APPROX.
- 32" APPROX.

- $345.00

**740104 40 CHEVY FIREWALL**
(2" SET-BACK) Small Block

**740106 40 CHEVY FIREWALL**
(4" SET-BACK) Big Block

**740129 40 FIREWALL LOWER BODY SUPPORT**

Sometimes the body support brackets below the firewall collects a lot of moisture and they rust out. At the same time we designed our firewall, we also designed and built a new smooth kit to replace the lower body supports. This kit will not only rid your car of rust, but the smooth look is much cleaner in appearance than the stock part with ribs and holes. They are made of 16 gauge steel and sold in pairs.

- $145.00

**740111 40 COWL VENT FILLERS**

Tired of your original cowl vent leaking water or pulling dust, smoke, etc.? Do you just want to smooth up the cowl area? Bitchin Parts makes a filler panel that might be just what you need. These 16 gauge steel filler panels come just a tick larger so they can be tuned for the perfect fit. The also have a beveled edge so the weld area is down, making it easier for a flush fit.

- $22.00

**NOTE:** These firewalls are designed for the most popular engine-transmission conversion which is Chevy engine and GMC turbo transmission. Any other engine installation (Ford, Mopar, etc.) may require rework of the bell housing area of the firewall.

The Set-Back Information Provided on This Page Is For your Information

NOTE: These firewalls are designed for the most popular engine-transmission conversion which is Chevy engine and GMC turbo transmission. Any other engine installation (Ford, Mopar, etc.) may require rework of the bell housing area of the firewall.

When Bitchin Parts designed our firewall, we also built a new smoothie kit to replace the lower body supports. These are great for when the body support brackets below the firewall collect a lot of moisture and rust out. They give a much smoother look. The 1941 brackets are made of 16 gauge steel and the 1942-48 are 12 gauge steel.
The rocker panel area on these cars have a tendency to rust out or to have sustained damage through the years from rocks or curbs. We offer rocker box kits for Coupes, Convertibles, 2-Door Sedans & Sedan Deliveries. This panel is not just an outer skin, it is a complete box assembly. There are (2) kits. The front kit extends from the cowl post all the way back to approximately 1” behind the door opening. The rear kit goes from the rear of the front kit to the rear wheel well. These are smoothie kits. There are no pre-punched holes for mounting moldings or running board rubber. The boxes are made out of 16 gauge cold rolled steel and come complete with new body mounts, instructions for easy installation.

Bitchin Parts manufactures Front Floorboards kits for the 41-48 Chevy Convertible. The Convertible is a rare item, but preferred by the Street Rodder. The Convertible frame has a huge center cross member which our floorboards are designed to clear. Each kit comes complete with easy-to-follow instructions. Please call (928) 420-6346 with any questions.
Bitchin Parts manufactures Rear Floorboard Kits for Sedans and Coupes. These kits have been designed to make your car more adaptable to modern seats & drive trains. They will splice right into our Front Floorboard Kits giving you a new floor from the firewall to the start of the trunk floorboard. These kits come complete with new body mounting brackets & instructions.

CALL 1-928-420-1254 TO ORDER TODAY!

The 1941 Chevy Convertibles are different from the Sedans & Coupes in the rear section. We divided the rear floorboard into two sections so you may order only the kits that you need. By purchasing the Front Floorboard Kit, Section 1 & 2 of the Rear Floorboard Kits & the Trunk Floorboard, you can have a complete new floorboard for your convertible.

The 1941-48 Chevy Trunk Repair Kit is made out of 16 gauge cold rolled steel. These kits come complete with step by step instructions. By removing the spare tire well out of the Sedan trunk, the Coupe & Sedan Kits are the same. (Kit also fits Convertible)

If you want to use your old firewall & floorboards, but have a problem with the automatic transmission cover not clearing the tranny, Bitchin Parts, makes an 18 gauge cold rolled steel transmission cover complete it’s a direct bolt-in part and will clear the auto transmission with ease. NOTE: Some slight modifications may be needed on the back edge of the tranny cover to fit the 41-48 Convertible cars.

Mounting a battery in a street rod has always created problems, some major and some minor. Our battery box kits will solve most of the problems. The universal mounting brackets supplied with these kits allow you to choose the mounting method which best suits your application, including flush floor mounting, side mounting, or halfway through the floor for extra ground clearance. We offer three kits. The positive battery hold down, adequate ventilation and cable protection give added security to your battery installation.

Group 42: 9 3/4 L x 7 W x 7 1/2 H
Group 71: 8 1/2 L x 7 1/4 W x 9 1/4 H
Optima: 10 1/2 L x 7 1/4 W x 8 1/2 H

530.00

749100 49-52 CHEVY FIREWALL
(4 1/2" SET-BACK) 26" Wide

These references are to help you decide which firewall kit will best fit your particular application. There are many factors which will affect your choice of kits: engine set-back, radiator core thickness, air conditioning or super chargers. You need to determine the length of the engine package you intend to install and then figure out the distance you have from the back of the radiator core to the stock or existing firewall. To do this you will know how much extra room or set-back you will need. The firewall only fits in one place in the body, but your engine can be moved forward or backward as much as needed to obtain proper clearances. If you have any questions, please call our customer service dept. @ (928) 420-6346.

ROCKERS

749118 49-52 OUTER ROCKER
44” Long and made of 16” gauge cold rolled steel. Thicker than Stock.

60.00

---

Our Cowl Vent Fillers are made from 18 Gage cold rolled steel and are a little larger than the Stock Cowl so they can be trimmed for a perfect fit. The edges are beveled so the weld area is below surface making it easier for a flush fit. Swap meet the original, and pocket the difference.
